DETAILED ACTION and ALLOWANCE

1. Claims 1-3, 5,6, 10-16 have been examined and allowed.

Drawings

2. Formal drawings filed on March 21, 2001, which included replacement sheets for drawings that where originally hand drawn are acceptable for printing.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:
4. Applicant's request for reconsideration of February 4, 2005 with arguments and clarification regarding language of the claims has overcome the prior Examiner's rejections under 35 U.S.C. 112 2nd paragraph. Therefore the rejection(s) has been overcome and withdrawn.
5. In the Advisory action of March 4, 2005, the prior Examiner withdrew the rejections regarding 101, the reasoning behind removing the rejection is based upon the determination that a data structure stored on a computer readable medium for use in a computer-aided design and verification system is statutory subject matter as would be a data structure stored on a computer readable medium, when executed on a computer is statutory subject matter. The computer-aided design and verification system is clearly a computer system. Further, the claims are directed to single statutory classes of invention and therefore the citation of *In re Lyell* is not germane to the Applicant's claims.

Art Unit: 2123

6. There are no prior art rejections standing or asserted against any of the claims in the instant case, giving deference to the prior Examiner's examination, including an updated search of the prior art prior art of record did not uncover a single teaching that expressly taught or render obvious the claimed invention in its entirety as recited in claims 1, 6 and 13. "A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." *Verdegaal Bros. v. Union Oil Co. of California*, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir. 1987). "The identical invention must be shown in as complete detail as is contained in the ... claim." *Richardson v. Suzuki Motor Co.*, 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an *ipsissimis verbis* test, i.e., identity of terminology is not required. *In re Bond*, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990). Though, pre-compiling, post-compiling and intermediate compiling, port mapping, instantiation and the use of multiple instrumentations in the context of HDL for design an verification systems are well known, the specific operations or steps as recited in claims 1, 6, and 13 were not uncovered that would clearly anticipate each independent claim, as the invention is recited in its entirety within each claim. Motivation to combine the teachings of the prior art of record, including that which would have been known to one with an ordinary level of skill in this art, was not uncovered so as to render the claimed invention obvious.

Dependent claims are allowable as they depend on the allowed independent claims.
